

CORONA VIRUS SITUATION – PLEASE READ

I respectfully ask for the safety of our clients and everyone associated with Eurovision Images that the following conditions are adhered to.

We will take all precautions, wearing masks and booties, washing our hands both before and after the shoot. We will bring only the equipment deemed necessary and make sure it has been cleaned with a disinfectant spray before entering the location.

1. We must be the only ones in the location at the time and prefer that the site to have been empty for 24 hours, though we realize this is often not possible.

2. We will not enter a location where there has been anyone sick or quarantined during the previous 7 days.

3. If it is necessary for the agent to be present, then that person must wear a mask, and respectively request that during the shoot we be left alone to accomplish our goals as quickly as possible.

4. Pre-preparation is particularly important at this time so we can accomplish the shoot as quickly as possible as we will avoid touching anything. Please read and follow as much as possible the 'Property Prep. Check List'. I advise clients to communicate the important photographs needed so we can accomplish your goals.

We reserve the right to leave the location without photographing should any of the above not be adhered to.

I appreciate your understanding and will relax these conditions once the situation improves.

Please contact me with any questions and requests.
